

H7078 五国QSG

版本:1.0

料号:807-0003-01082

成型尺寸:150×105(mm)

材质:128G哑粉纸

工艺:骑马订,单色印刷

页数:12页

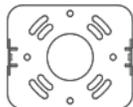

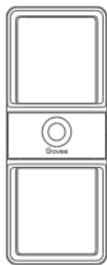

Quick Start Guide

Govee Smart Outdoor Wall Light

What You Get

- Every H7078 package includes the following:

X3

X2

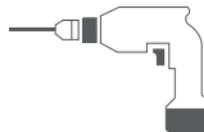

X6

X6

What You Need

- Prepare the following tools before installing:

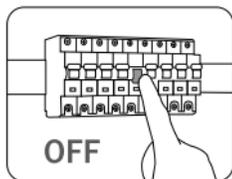

Safety Instructions

- For your safety, this product must be installed in accordance with local building laws. Consult or engage a registered and qualified electrician to install it for you. If you are installing this product yourself, make sure you notify your local government building control authority to inspect and test your installation.
- Never take risks with electrical safety. Before you start any type of electrical work, make sure the environment is absolutely safe.
- Place the light away from children to avoid dangers resulting from improper operation.
- This product is rated as IP65 Waterproof. It can be used outdoors but cannot be immersed in water.
- During installation, avoid scratching the light cover which might affect the lighting effects.

Installing Your Device

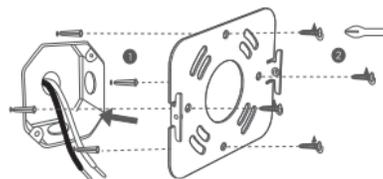

- 1 Cut off the power where you plan to install the light.

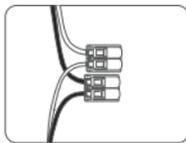

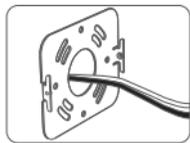

- 2 Use an electric tester pen or voltmeter to test the circuit. Make sure there is no power before operating.

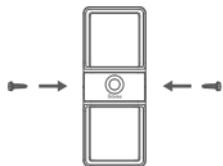

- 3 Install the backplate horizontally.

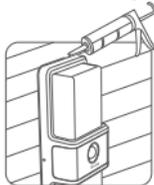

- 4 Wire the wall light. The phase wire is brown, and the neutral wire is blue.

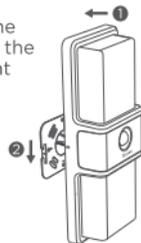

- 6 Make sure the light is in place and then use screws to fix the wall light on both sides.

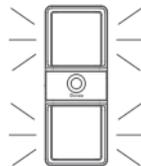

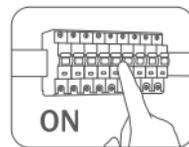

- 7 Use the sealant to caulk around the wall light. Note: This operation is designed to prevent the terminals from being exposed to rainwater.

- 5 Align the wall light with the backplate from above and slide down to attach it to the backplate. Please note that the light cover part should point towards the ground.

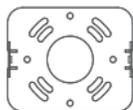

- 8 Power on and enjoy your light!

Das erhalten Sie

- Jedes H7078-Paket beinhaltet Folgendes:

Was Sie benötigen

- Bereiten Sie vor der Installation die folgenden Tools vor:

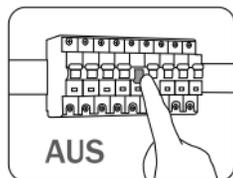

Sicherheitshinweise

- Zu Ihrer Sicherheit muss dieses Produkt in Übereinstimmung mit den örtlichen Bauvorschriften installiert werden. Lassen Sie sich von einem anerkannten und qualifizierten Elektriker beraten oder beauftragen Sie ihn mit der Installation. Wenn Sie dieses Produkt selbst installieren, benachrichtigen Sie unbedingt Ihre örtliche Bauaufsichtsbehörde, um Ihre Installation zu überprüfen und zu testen.
- Gehen Sie bei der elektrischen Sicherheit niemals Risiken ein. Stellen Sie vor Beginn jeglicher Elektroarbeiten sicher, dass die Umgebung absolut sicher ist.
- Platzieren Sie die Leuchte außerhalb der Reichweite von Kindern, um Gefahren durch unsachgemäßen Betrieb zu vermeiden.
- Dieses Produkt ist gemäß IP65 wasserdicht. Es kann im Freien verwendet werden, darf aber nicht in Wasser getaucht werden.
- Vermeiden Sie bei der Installation die Lichtabdeckung zu zerkratzen, da dies die Lichteffekte beeinträchtigen könnte.

Installieren Ihres Geräts

- 1 Unterbrechen Sie den Strom an der Stelle, an der Sie die Leuchte installieren möchten.

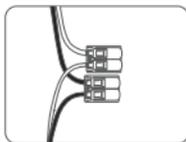

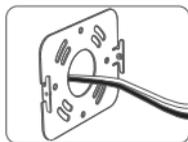

- 2 Verwenden Sie zum Testen des Stromkreises einen elektrischen Prüfstift oder ein Voltmeter. Stellen Sie vor dem Betrieb sicher, dass keine Stromversorgung vorhanden ist.

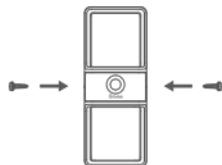

■ Phase Draht
□ Neutralleiter

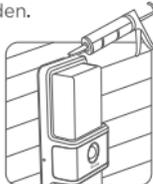

- 4 Verdrahten Sie die Wandleuchte. Der Phasendraht ist braun, der Nullleiter ist blau.

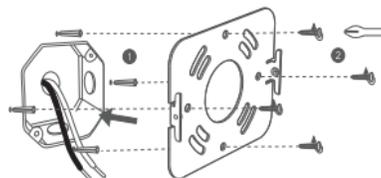

- 6 Stellen Sie sicher, dass die Leuchte angebracht ist, und befestigen Sie die Wandleuchte dann auf beiden Seiten mit Schrauben.

- 7 Verwenden Sie das Dichtmittel, um die Wandleuchte abzudichten. Hinweis: Durch diesen Vorgang soll verhindert werden, dass die Terminals Regenwasser ausgesetzt werden.

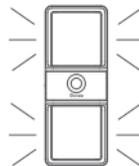

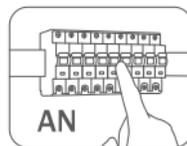

- 3 Installieren Sie die Rückplatte horizontal.

- 5 Richten Sie die Wandleuchte von oben an der Rückplatte aus und schieben Sie sie nach unten, um sie an der Rückplatte zu befestigen. Bitte beachten Sie, dass der Teil der Lichtabdeckung zum Boden zeigen sollte.

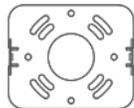

- 8 Einschalten und Ihr Licht genießen!

Contenu du carton

Ce dont vous avez besoin

- Préparez les outils suivants avant l'installation :

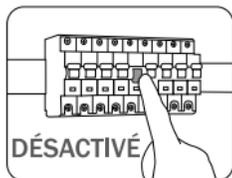

Consignes de sécurité

- Pour votre sécurité, ce produit doit être installé conformément aux réglementations locales en matière de construction. Adressez-vous à un électricien agréé et qualifié ou chargez-le de l'installation. Si vous installez ce produit vous-même, vous devez avertir votre autorité locale de contrôle des constructions afin qu'elle inspecte et vérifie votre installation.
- Ne prenez aucun risque en matière de sécurité électrique. Avant d'entreprendre des travaux électriques, assurez-vous que l'environnement est absolument sûr.
- Placez la lampe hors de portée des enfants afin d'éviter les risques liés à une mauvaise utilisation.
- Ce produit est classé étanche selon la norme IP65. Il peut être utilisé à l'extérieur mais ne doit pas être immergé dans l'eau.
- Pendant l'installation, évitez de rayer le cache du luminaire, ce qui pourrait nuire à l'effet lumineux.

Installation de votre appareil

- 1 Coupez le courant à l'endroit où vous souhaitez installer la lumière.

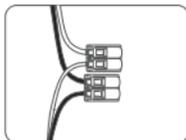

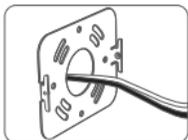

- 2 Utilisez un stylo de contrôle électrique ou un voltmètre pour tester le circuit électrique. Assurez-vous qu'il n'y a pas de courant avant de commencer.

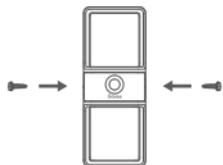

■ Fil de phase
□ Fil Neutre

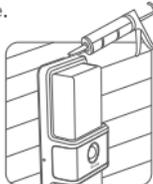

- 4 Raccordez l'applique murale. Le fil de phase est de couleur marron, tandis que le fil neutre est de couleur bleue.

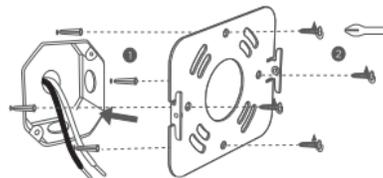

- 6 Assurez-vous que la lumière est en place, puis fixez l'applique murale avec des vis de chaque côté.

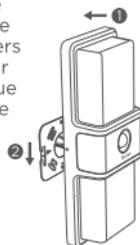

- 7 Utilisez le scellant pour calfeutrer autour de l'applique murale. Remarque : Cette opération a pour but d'éviter que les terminaux ne soient exposés à l'eau de pluie.

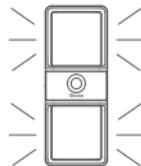

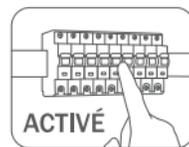

- 3 Installez horizontalement la plaque arrière.

- 5 Aligned l'applique murale avec le mur du fond par le haut et faites-la glisser vers le bas pour la fixer au mur du fond. Veuillez noter que la partie du cache-lumière doit être orientée vers le sol.

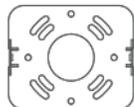

- 8 Allumez et profitez de votre lumière !

Lo que necesita

- Prepare las siguientes herramientas antes de realizar la instalación:

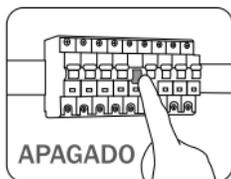

Instrucciones de seguridad

- Por su seguridad, este producto debe instalarse de acuerdo con las leyes de construcción locales. Consulte o contrate a un electricista cualificado para que lo instale. Si instala este producto usted mismo, asegúrese de notificar a las autoridades de control de edificios locales para que inspeccionen y prueben la instalación.
- Nunca corra riesgos con la seguridad eléctrica. Antes de iniciar cualquier tipo de trabajo eléctrico, asegúrese de que el entorno sea totalmente seguro.
- Instale la luz lejos del alcance de los niños para evitar peligros resultantes de un funcionamiento inadecuado.
- Este producto tiene una clasificación de resistencia al agua IP65. Se puede utilizar en exteriores, pero no se puede sumergir en agua.
- Durante la instalación, evite rayar la cubierta de la luz, lo que podría afectar a los efectos lumínicos.

Instalación de su dispositivo

- 1 Corte la corriente de la zona en que planea instalar la luz.

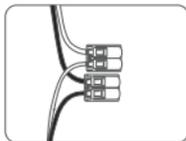

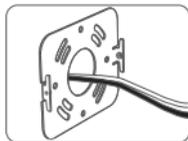

- 2 Utilice un lápiz de prueba eléctrica o un voltímetro para probar el circuito. Asegúrese de que no haya corriente antes de realizar la instalación.

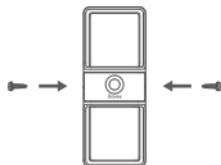

■ Cable de fase
□ Cable neutro

- 4 Conecte la luz de pared. El cable de fase es marrón, y el cable neutro es azul.

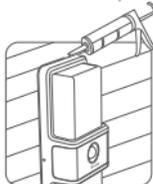

- 6 Asegúrese de que la luz esté bien colocada y fíjela usando tornillos en ambos lados.

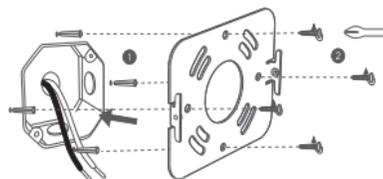

- 7 Utilice el sellador para calafatear la junta entre la luz y la pared.

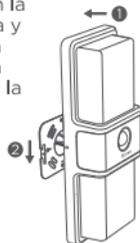

Nota: Esta operación está diseñada para evitar que los terminales queden expuestos a la lluvia.

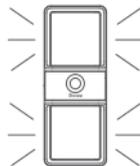

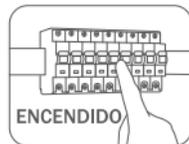

- 3 Instale la placa trasera horizontalmente.

- 5 Alinee la luz de pared con la placa trasera desde arriba y deslícela hacia abajo para fijarla a la placa. Tenga en cuenta que la cubierta de la luz debe apuntar hacia el suelo.

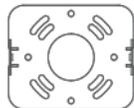

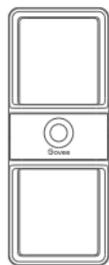

- 8 ¡Reactiva la corriente y disfrute de su luz!

Contenuto

- Ogni confezione H7078 include quanto segue:

Cosa serve

- Preparare i seguenti strumenti prima dell'installazione:

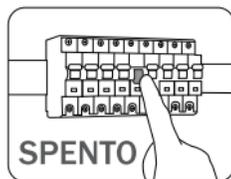

Istruzioni di sicurezza

- Per la tua sicurezza, questo prodotto deve essere installato in conformità con le leggi edilizie locali. Consultare o incaricare un elettricista registrato e qualificato per l'installazione. Se si installa questo prodotto da soli, assicurarsi di informare l'autorità governativa locale preposta al controllo degli edifici affinché ispezioni e verifichi l'installazione.
- Non correre mai rischi in materia di sicurezza elettrica. Prima di iniziare qualsiasi tipo di lavoro elettrico, assicurati che l'ambiente sia assolutamente sicuro.
- Posizionare la lampada lontano dalla portata dei bambini per evitare pericoli derivanti da un utilizzo improprio.
- Questo prodotto è classificato come impermeabile IP65. Può essere utilizzato all'aperto ma non può essere immerso in acqua.
- Durante l'installazione, evitare di graffiare il coperchio della lampada che potrebbe compromettere gli effetti di illuminazione.

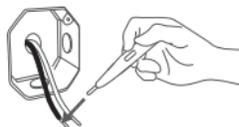

Installazione del dispositivo

- 1 Staccare la corrente nel punto in cui si prevede di installare la luce.

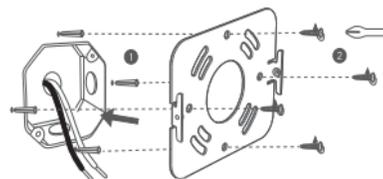

- 2 Utilizzare un tester elettrico o un voltmetro per testare il circuito. Assicurarsi che non vi sia alimentazione prima dell'uso.

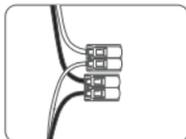

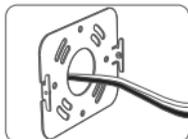

■ Filo di fase
□ Filo neutro

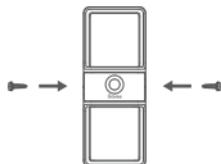

- 3 Installare la piastra posteriore orizzontalmente.

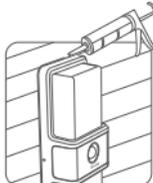

- 4 Cablare la luce da parete. Il filo di fase è marrone, il filo neutro è blu.

- 6 Assicurarsi che la luce sia in posizione e quindi utilizzare le viti per fissare la lampada da parete su entrambi i lati.

- 7 Usare il sigillante per sigillare la zona della lampada da parete.
Nota: Questa operazione ha lo scopo di evitare che i terminali siano esposti all'acqua piovana.

- 5 Allineare la lampada da parete con la piastra posteriore dall'alto e farla scorrere verso il basso per fissarla alla piastra posteriore. La parte della copertura della luce deve essere rivolta verso il suolo.

- 8 Accendi e goditi la tua luce!
