## 1. WHAT'S INSIDE

- Razer Viper V3 HyperSpeed

- A. Left mouse button
- B. Indicator LED
- C. Right mouse button
- D. Scroll wheel
- E. Mouse button 5
- F. Mouse button 4
- G. DPI cycle button\*

- H. PTFE mouse feet
- I. Razer™ Focus Pro 30K Optical Sensor
- J. Power on / off switch
- K. Battery / Wireless dongle compartment and cover
- L. Razer HyperSpeed Wireless Dongle

*\*The DPI stages are 400, 800, 1600 (default), 3200, and 6400, and can be customized using Razer Synapse.*

- 1 x AA battery

- Important Product Information Guide

---

## 2. WHAT'S NEEDED

### PRODUCT REQUIREMENTS

- USB Type A port
- 1 x AA battery

### RAZER SYNAPSE REQUIREMENTS

- Windows® 10 64-bit (or higher)
- Internet connection for software installation

---

## 3. LET'S GET YOU COVERED

Register your product and score exclusive benefits

[razerid.razer.com/warranty](https://razerid.razer.com/warranty)

*Your product's  
serial number can  
be found here.*

---

## 4. TECHNICAL SPECIFICATIONS

- Form factor: Right-handed Symmetrical
- Connectivity: Razer HyperSpeed Wireless
- Battery life:
  - Up to 280 hours on HyperSpeed Wireless at 1000 Hz
  - Up to 75 hours on HyperPolling Wireless at 4000 Hz
- RGB lighting: No
- Sensor: Focus Pro 30K Optical Sensor
- Max sensitivity (DPI): 30000
- Max speed (IPS): 750
- Max acceleration (G): 50
- Programmable buttons: 8
- Switch type: Mechanical Mouse Switches Gen-2
- Switch lifecycle: 60-million Clicks
- On-board memory profiles: 1
- Mouse feet: 100% PTFE
- Dock compatibility: No

---

## 5. SETTING UP YOUR RAZER VIPER V3 HYPERSPEED

1. Remove the battery compartment cover and insert, and remove the wireless dongle.

2. Insert the battery as indicated in the compartment and reattach the compartment cover.

**Caution:** The included AA battery is non-rechargeable. Dispose of batteries in accordance with your local environmental laws.

3. Insert the wireless dongle into any of the USB ports on your PC.

4. Switch on the mouse and wait for it to connect to the wireless dongle. The indicator LED will turn solid green to show that the mouse is connected to the wireless dongle.

- i** Install Razer Synapse when prompted, or download the installer from [razer.com/synapse](https://razer.com/synapse) to personalize your mouse's DPI settings, button configurations, polling rate, and other features.

---

## 5. USING YOUR MOUSE

### POWER ON/OFF

Set the power on / off switch to on or off to switch on / off the mouse.

### UNDERSTANDING THE LOW BATTERY WARNING

The indicator LED will blink red twice in repeated intervals to indicate that the battery power of the mouse is less than 5%.

**i** This lighting sequence will repeat until the battery is drained or replaced.

## CHANGING THE MOUSE'S DPI

Change the mouse's DPI to match your playstyle with a press of the DPI cycle button, or fine-tune your own sensitivity settings using the Razer Synapse app. The indicator LED will briefly change its color to show which DPI stage is currently active.

| DPI            | Indicator LED |
|----------------|---------------|
| 400            | Red           |
| 800            | Green         |
| 1600 (default) | Blue          |
| 3200           | Cyan          |
| 6400           | Yellow        |

**i** When Razer Synapse is installed, an on-screen prompt will display as you cycle through each DPI stage.

---

## 7. CONFIGURING YOUR RAZER VIPER V3 HYPERSPEED VIA RAZER SYNAPSE

 *Internet connection is required for installation, updates, and cloud-based features. Registering for a Razer ID account is recommended but optional. All listed features are subject to change based on the current software version, the connected device(s), and supported apps and software.*

### SYNAPSE TAB

The Synapse tab is your default tab when you first launch Razer Synapse. This tab allows you to navigate the Dashboard subtab.

#### Dashboard

The Dashboard subtab is an overview of your Razer Synapse, where you can access all your Razer devices, modules, and online services.

## Modules

The Modules subtab displays all installed and available modules for installation.

## Global Shortcuts

Bind operations or Razer Synapse functions to custom key combinations from any Razer Synapse-enabled device inputs, which apply across all device profiles. [Learn more about Profiles](#)

**!** *Only Razer Synapse-enabled device inputs will be recognized.*

## MOUSE TAB

The Mouse tab is the main tab for your Razer Viper V3 HyperSpeed. From here, you can change your device's settings, such as button assignment, stored profiles, and DPI sensitivity. Changes under this tab are automatically saved to your system and cloud storage.

### Customize

The Customize subtab is for modifying your mouse's button assignments.

### Profile

A Profile is a data storage for keeping all your Razer peripheral's settings. By default, the profile name is based on your system's name. To add, import, rename, duplicate, export, reset or delete a profile, press the Miscellaneous button ( ●●● ).

### Standard / Hypershift

Hypershift mode is a secondary set of button assignments activated when the Hypershift key is held down. By default, the Hypershift key is assigned to the fn key of your Razer Synapse-supported keyboard. However, you can also set any mouse button to activate Hypershift mode.

### HyperSpeed Multi-Device Pairing

Use this feature to pair an additional HyperSpeed-compatible device with the Razer HyperSpeed Wireless Dongle of your Razer Viper V3 HyperSpeed. As its wireless dongle can support a keyboard and mouse simultaneously, you can remove the usage of separate dongles for each peripheral.

 *To use this feature, your Razer Viper V3 HyperSpeed must be connected via Razer HyperSpeed Wireless (2.4 GHz) mode. Each peripheral can only connect to one dongle at a time.*

### Sidebar

Clicking the Sidebar button (  ) will reveal all current button assignments for your Razer Viper V3 HyperSpeed.

Alternatively, you can skip to a specific button assignment by selecting it on the Customize tab.

Upon selecting a button assignment, you may then change it to one of the following functions:

#### Default

This option enables you to return the mouse button to its original setting.

#### Keyboard Function

This option changes the button assignment into a keyboard function. You can also enable Turbo mode, which allows you to emulate a repeated keyboard function while the button is held down.

#### Mouse Function

This option substitutes the current button assignment for another mouse function. Listed below are the functions which you can choose from:

- Left Click - Performs a left mouse click using the assigned button.
- Right Click - Performs a right mouse click using the assigned button.

- Scroll Click - Activates the universal scrolling function.
- Double Click - Performs a double left click using the assigned button.
- Mouse Button 4 - Performs a "Backward" command for most internet browsers.
- Mouse Button 5 - Performs a "Forward" command for most internet browsers.
- Scroll Up - Performs a "Scroll Up" command using the assigned button.
- Scroll Down - Performs a "Scroll Down" command using the assigned button.
- Scroll Left - Performs a "Scroll Left" command using the assigned button.
- Scroll Right - Performs a "Scroll Right" command using the assigned button.

You can also choose to enable Turbo mode in some of the mouse functions, which allows you to emulate repeatedly pressing and releasing said function while the button is held down.

## Sensitivity

This function allows you to manipulate the DPI setting of your Razer Viper V3 HyperSpeed with a touch of a button. Listed below are the Sensitivity options and their description:

- Sensitivity Clutch - Changes the sensitivity to a predefined DPI while the designated button is held down. Releasing the button will return it to the previous sensitivity.
- Sensitivity Stage Up - Increases the current sensitivity by one stage.
- Sensitivity Stage Down - Decreases the current sensitivity by one stage.
- On-The-Fly Sensitivity - Pressing the designated button and moving the scroll wheel either up or down will increase or decrease the current DPI.
- Cycle Up Sensitivity Stages - Increases the current sensitivity stage by one. Once it reaches the highest sensitivity stage, it will return to stage 1 when the button is pressed again.
- Cycle Down Sensitivity Stages - Decreases the current sensitivity stage by one. Once it reaches stage 1, it will return to the highest sensitivity stage when the button is pressed again. [Learn more about Sensitivity Stages](#)

## M Macro

A Macro is a prerecorded sequence of keystrokes and button presses that is executed with precise timing. You can conveniently execute a chain of commands by setting the button function to Macro. This function will only be visible when the Macro module is installed.

## Inter-device

Inter-device allows you to change the functionality of other Razer Synapse-enabled devices. Some of these functionalities are device-specific such as using your Razer gaming keyboard to change the Sensitivity Stage of your Razer gaming mouse.

## Switch Profile

Switch Profile lets you quickly change profiles and load a new set of button assignments. An on-screen notification will appear whenever you switch profiles.

## Switch Lighting

Switch Lighting allows you to switch between all advanced lighting effects easily. This function will only be visible when the Chroma Studio module is installed.

## Razer Hypershift

Setting the button to Razer Hypershift will allow you to activate Hypershift mode as long as the button is held down.

## Launch Program

Launch Program lets you open an app or a website using the assigned button. When you select Launch Program, two choices will appear, which require you to search for a specific app you want to open or write the website address you want to visit.

## Multimedia

This option allows you to assign multimedia controls to your Razer device. Listed below are the multimedia controls you can choose from:

- Volume Down - Decreases the audio output.
- Volume Up - Increases the audio output.
- Mute Volume - Mutes the audio.
- Mic Volume Up - Increases the microphone volume.
- Mic Volume Down - Decreases the microphone volume.
- Mute Mic - Mutes the microphone.
- Mute All - Mutes both microphone and audio output.

- Play / Pause - Play, pause, or resume playback of the current media.
- Previous Track - Play the previous media track.
- Next Track - Play the next media track.

## Windows Shortcuts

This option allows you to assign your preferred button to a Windows Operating System shortcut command. For more information, please visit: [support.microsoft.com/kb/126449](https://support.microsoft.com/kb/126449)

## Text Function

Text Function enables you to type a prewritten text with a touch of a button. Simply write your desired text on the given field, and your text will be typed whenever the assigned button is pressed. This function has full Unicode support, and you can also insert special symbols from character maps.

## Disable

This option renders the assigned button unusable. Use Disable if you do not want to use the selected button or if it interferes with your gaming.

## Performance

The Performance subtab allows you to modify the sensitivity, acceleration, and polling rate.

### Sensitivity

Sensitivity refers to the distance the cursor will travel based on how far the mouse moves. The higher the DPI, the farther the cursor will travel, given the same mouse movement distance.

### Sensitivity Stages

A sensitivity stage is a preset sensitivity value. When enabled, you can create up to 5 different sensitivity stages, which you can cycle through using the DPI cycle button.

### Enable X-Y Sensitivity

By default, the X-axis (horizontal) and Y-axis (vertical) use the same sensitivity values. However, you may set different sensitivity values for each axis by selecting the Enable X-Y option.

### Polling Rate

The higher the polling rate, the more often the computer receives information about the status of your mouse, effectively reducing input latency and improving your mouse pointer's reaction time. You can switch between 125Hz, 500Hz, and 1000Hz by selecting your desired polling rate from the options provided.

### *Mouse Properties*

Access the Windows Mouse Properties, where you can modify operating system settings that directly affect your mouse.

## Calibration

The Calibration subtab allows you to optimize the sensor of your Razer mouse to any surface for better tracking.

### Smart Tracking

Smart Tracking lets you set the distance the sensor stops tracking when it's lifted from its surface to avoid unwanted cursor movement. You may assign different values to the lift-off and landing distances by selecting the Enable Asymmetric Cut-Off.

## Power

The Power subtab allows you to set your device to enter sleep mode when idle for a certain amount of time or manage its energy consumption when the battery level is low.

**i** For accurate battery level detection, it's recommended that you set the type of battery you're using in the battery selection.

## PROFILES TAB

The Profiles tab is a convenient way to manage all your profiles and link them to your games and applications.

### Devices

View which games are linked to each device's profiles or which Chroma Effect is linked to specific games using the Devices subtab.

You can import Profiles from your computer or the cloud through the import button (  ) or create new profiles within the selected device using the add button (  ). To rename, duplicate, export, or delete a profile, simply press the Miscellaneous button (  ). Each profile can be set to activate when you run an application using the Linked Games option.

## Linked Games

The Linked Games subtab allows you to add games, view devices linked to games, or search for added games. You can also sort games based on alphabetical order, last played, or most played. Added games will still be listed here, even if they are not linked to a Razer device.

To link games to connected Razer devices or Chroma Effects, simply click on any game from the list, and then click **Select a device and its profile to launch automatically during gameplay** to select the Razer device or Chroma Effect it will link with. Once connected, you may click the Miscellaneous button ( ●●● ) of the corresponding Chroma Effect or device to select a specific Chroma Effect or profile.

## SETTINGS WINDOW

The Settings window, accessible by clicking the ( ⚙ ) button on Razer Synapse, enables you to configure the startup behavior and display language of Razer Synapse, control the recommendations you see on the Dashboard, check the firmware version and master guide of each Razer device, or perform a factory reset on any connected Razer device.

### General tab

The General tab lets you change the software's display language, startup behavior, theme, and on-screen notifications. You may also manually sync your profiles to the cloud ( ↻ ) or view the master guide of all connected Razer devices and installed modules.

### Dashboard tab

Use the Dashboard tab to customize which Razer device recommendations based on your setup, and the games you play will appear on the Dashboard.

### Firmware tab

Access the Firmware tab to view the current firmware version of your Razer device(s), and/or visit the Software and Firmware Update page to see whether a firmware update is available for your device(s).

## Reset tab

The Reset tab allows you to perform a factory reset on all connected Razer devices with on-board memory and/or reset Razer Synapse tutorials to acquaint yourself again with Razer Synapse's new features on its next launch.

*All profiles stored on the selected device's on-board memory will be erased when you reset a Razer device.*

## About tab

The About tab displays brief software information and copyright statement, and provides relevant links for its terms of use. You may also use this tab to check for software updates, or as quick access to Razer's social communities.

---

## 8. SAFETY AND MAINTENANCE

### SAFETY GUIDELINES

To achieve maximum safety while using your Razer Viper V3 HyperSpeed, we suggest that you adopt the following guidelines:

Should you have trouble operating the device properly and troubleshooting does not work, unplug the device and contact the Razer hotline or go to [support.razer.com](https://support.razer.com) for assistance.

Don't take apart the device, and don't attempt to operate it under abnormal current loads. Doing so will void your warranty.

Keep the device away from liquid, humidity, or moisture. Operate the device only within the specific temperature range of 0°C (32°F) to 40°C (104°F). Should the temperature exceed this range, unplug and/or switch off the device to stabilize the temperature to an optimal level.

### COMFORT

Research has shown that long periods of repetitive motion, improper positioning of your computer peripherals, incorrect body position, and poor habits may be associated with physical discomfort and injury to nerves, tendons, and muscles. Below are some guidelines to avoid injury and ensure optimum comfort while using your Razer Viper V3 HyperSpeed.

- Position your keyboard and monitor directly in front of you with your mouse next to it. Place your elbows next to your side, not too far away, and your keyboard within easy reach.
- Adjust the height of your chair and table so that the keyboard and mouse are at or below elbow-height.
- Keep your feet well supported, posture straight, and your shoulders relaxed.
- During gameplay, relax your wrist and keep it straight. If you do the same tasks with your hands repeatedly, try not to bend, extend or twist your hands for long periods.
- Don't rest your wrists on hard surfaces for long periods. Use a wrist rest to support your wrist while gaming.
- Don't sit in the same position all day. Get up, step away from your desk and do exercises to stretch your arms, shoulders, neck, and legs.

If you experience any physical discomfort while using your mouse, such as pain, numbness, or tingling in your hands, wrists, elbows, shoulders, neck, or back, please consult a qualified medical doctor immediately.

## MAINTENANCE AND USE

The Razer Viper V3 HyperSpeed requires minimum maintenance to keep it in optimum condition. Once a month, we recommend you unplug the device from the computer and clean it using a soft cloth or cotton swab to prevent dirt buildup. Don't use soap or harsh cleaning agents.

To get the ultimate experience in movement and control, we highly recommend a premium mouse mat from Razer. Some surfaces will cause undue wear on the feet requiring constant care and eventual replacement.

Do note that the Razer Viper V3 HyperSpeed's sensor is 'tuned' or optimized specially for the Razer mouse mats. This means that the sensor has been tested extensively to confirm that the Razer Viper V3 HyperSpeed reads and tracks best on Razer mouse mats.
