

owners, this instruction must be surrendered to the new owner.

- Packing:**
- After unpacking the appliance, check the same for transport damage and the contents for completeness. In the event of damage or an incomplete delivery, please contact the responsible authority immediately!
 - Do not discard the original box! It can be used for storage and disposal to avoid transport damage.
 - Dispose of the packing material in a proper manner. Plastic bags should keep away from children!

Parts-Description (Fig. A):

- Base
- Stand feet
- Front grille
- Fan blade
- Grille retaining ring
- Rear grille
- Motor shaft / Motor front
- Motor housing
- Oscillating control knob
- Push buttons

Assembly – (Fig. A):

Caution! The fan should always be switched off and does not connected to the mains supply, if you mounting the fan.

Please assemble ahead as follows:

- Un-screw the grille retaining ring (5) from the motor front (7) by rotating it anti-clockwise.
- Position the rear grille (6) on the motor shaft/motor front (7) and ensuring that the locating pins are engaged correctly in the holes in the grille. The handle should be on top. Ensure a proper fit.
- Screw the grille retaining ring (5) firmly onto the projecting thread on the motor shaft (7) by rotating clockwise and tighten firmly.

- Place the fan blade (4) onto the motor shaft (7), locating the slot at the back of the blade on the drive pin that passes through the motor shaft (7).
- Un-screw the locking screw mounted on the grille. Mount front grille (3) onto the rear grille (6) with the small round holes matched for passage of locking screw. Fix both grilles with the clips and then use screw driver to tighten the locking screw – see Fig. B.

Pay attention that all fan parts are correct and firmly connected with each other.

Operating instructions:

Connect to the mains supply only after the fan has been fully assembled.

- Place the fan on a stable, flat, dry surface and lock for a firm and secure stand.
- Check the fan is switched off.
- Insert the plug of the fan into a suitable socket outlet. The fan is ready to operate.
- By pushing the fan control push button (10) you can choose the speed levels of the fan:

0 = OFF
1 = low speed

2 = high speed
